

Manual Test Data — Set 2

Sample dataset for each module/form, matching the exact validation rules in the code. Enter these **in order** — Tasks, Vendor Categories, and Expenses all need an Event to already exist, and Expenses need a Vendor Category to already exist.

1

Register — </register>

Field	Value
Full Name	Hassan Raza
Email	hassan.raza@example.com
Password	Corporate123
Confirm Password	Corporate123
Profile Image	(optional, leave blank)
Terms & Conditions	checked

Rules: full_name required (max 100) · email required, valid, unique · password required min 8 chars + must match confirmation · terms must be accepted.

2

Login — </login>

Field	Value
Email	hassan.raza@example.com
Password	Corporate123

3 Create Event — Events page → “New Event”

Field	Value
Event Name	TechNova Annual Conference 2026
Event Type	Corporate Event
Custom Event Type	(leave blank — only required if Event Type = Custom)
Event Date	2026-10-05
Event Time	09:00
Confirmed Guests	300
Guest Capacity	350
Venue Name	Expo Centre Karachi
Location	Karachi, Pakistan
Venue Image	(optional)
Total Budget	1200000
Budget Spent	0
Currency	PKR
Description	Two-day tech conference with keynote speakers, workshops, and an exhibition hall.

Rules: event_name required (max 200) · event_type required (Wedding/Birthday Party/Corporate Event/Baby Shower/Graduation/Custom) · event_date required valid date · event_time optional **HH:MM** · currency required (PKR or USD).

Note: event creation no longer auto-generates AI tasks (removed for speed) — it only creates the event + suggested vendor categories. Use the “Generate with AI” button on the event page if you want AI tasks, or add tasks manually below.

4 Add Task — inside an event → Tasks tab

Task 1

Field	Value
Task Name	Book keynote speakers
Phase	Pre-Planning
Due Date	2026-08-10
Priority	High
Depends On	(leave blank)
Notes	Confirm 3 speakers and their travel arrangements.

Task 2 (tests the dependency field)

Field	Value
Task Name	Send sponsor invitations
Phase	Preparation
Due Date	2026-09-01
Priority	Medium
Depends On	Book keynote speakers
Notes	Reach out to 10 potential sponsors.

Task 3

Field	Value
Task Name	Set up registration desk
Phase	Day-Of
Due Date	2026-10-05
Priority	High
Notes	Arrive 2 hours early to test badge printers.

Rules: task_name required (max 255) · phase required (Pre-Planning/Preparation/Day-Of) · priority required (Low/Medium/High) · dependency_task_id must be another task in the same event.

5 Add Vendor Category — inside an event → Budget/Categories tab

Category 1

Field	Value
Category Name	Venue Rental
Suggested Percentage	30
Allocated Amount	360000
Notes	Two-day hall booking including AV setup.
Locked	☐
AI Priority	1

Category 2

Field	Value
Category Name	Catering
Suggested Percentage	25
Allocated Amount	300000
Notes	Lunch + tea breaks for 300 guests, both days.
Locked	☐
AI Priority	2

Category 3

Field	Value
Category Name	Marketing & Signage
Suggested Percentage	10
Allocated Amount	120000
Notes	Banners, digital ads, printed programs.

Rules: category_name required (max 150) · allocated_amount required numeric ≥ 0 · suggested_percentage optional 0–100.

6 Add Expense — inside an event → Expenses tab

Requires a Vendor Category to already exist (use "Venue Rental" / "Catering" from step 5).

Expense 1

Field	Value
Category	Venue Rental
Vendor/Item Name	Expo Centre Karachi Booking
Estimated Cost	350000
Actual Cost	360000
Payment Status	Paid
Date Logged	2026-07-20
Notes	Full payment made in advance to secure the hall.

Expense 2

Field	Value
Category	Catering
Vendor/Item Name	Metro Catering Services
Estimated Cost	300000
Actual Cost	280000
Payment Status	Partially Paid
Date Logged	2026-07-19
Notes	40% advance paid, balance due after event.

Rules: category_id and event_id must reference existing rows · vendor_item_name required (max 255) · estimated_cost & actual_cost required numeric ≥ 0 · payment_status one of Paid/Pending/Partially Paid.

7 Trigger the AI Panic Button & Budget Rebalancer — Budget page

The Rebalancer Sandbox only appears once a category is over budget, and it's most useful to test when there's a mix of locked / paid / open categories to rebalance across. Add these two extra vendor categories first, then log the expense that pushes Venue Rental into the red.

Category 4 (stays open/unspent — used to absorb the cut)

Field	Value
Category Name	Marketing & Signage
Suggested Percentage	10
Allocated Amount	120000
Notes	Banners, digital ads, printed programs.
Locked	unchecked

(Skip if you already added this as Category 3 in step 5.)

Category 5 (stays open/unspent — used to absorb the cut)

Field	Value
Category Name	Speaker Gifts & Swag
Suggested Percentage	8
Allocated Amount	96000
Notes	Gift hampers and branded merchandise for attendees.
Locked	unchecked

Category 6 (manually locked — should stay untouched by every strategy)

Field	Value
Category Name	Security & Logistics
Suggested Percentage	6
Allocated Amount	72000
Notes	Event security staff and crowd control.
Locked	checked

Expense 3 (this is the one that trips the Panic Button — pushes Venue Rental to 375,000 spent against a 360,000 allocation)

Field	Value
Category	Venue Rental
Vendor/Item Name	Last-minute stage extension
Estimated Cost	10000
Actual Cost	15000
Payment Status	Pending
Date Logged	2026-07-20
Notes	Extra platform space requested by AV vendor.

What you should see after saving Expense 3, on the Budget page (</budget>):

1. The “Budget Alerts” card shows a red **“Budget overrun detected. Rebalance remaining categories to stay on track?”** banner with a **Rebalance** button.
2. Click it to open the **Rebalancer Sandbox** modal. It should show:
 - Over Budget By: **PKR 15,000** (375,000 spent – 360,000 allocated on Venue Rental)
 - Flexible Liquidity Left: sum of unspent headroom across Catering/Marketing/Speaker Gifts/Security
3. With **Proportional** selected (default): the PKR 15,000 deficit should be spread across Marketing & Signage and Speaker Gifts & Swag in proportion to their allocations — Catering is skipped (it has a **Partially Paid** expense reducing flexibility, verify against actual app behavior) and Security & Logistics is skipped (manually locked).
4. Switch to **Targeted**: the full PKR 15,000 should come out of whichever open category has the most unspent headroom (Marketing & Signage, since it has the biggest untouched allocation) — Speaker Gifts & Swag should be untouched.
5. Switch to **AI-Suggested**: requires `AI_TASK_API_KEY` set in `.env` (same key used for AI task generation) and outbound internet access — if it’s not configured you should see a clean error message, not a crash.
6. Check/uncheck the lock icon next to Marketing & Signage and confirm the chart + numbers recalculate to exclude it.
7. Click **Commit Changes** — the modal should show a success message and reload the page. Venue Rental’s allocation should now read 375,000 (no longer flagged over budget), and the amount should have been pulled from the categories you didn’t lock.

Quick checklist

- ☐ Register a user
- ☐ Log in
- ☐ Create 1 event
- ☐ Add 2–3 tasks (including one with a dependency, one in each phase)
- ☐ Add 2–3 vendor categories
- ☐ Add 2 expenses tied to those categories
- ☐ Check Dashboard, Budget, Progress, and Timeline pages reflect the entered data
- ☐ Check Activity log picked up the auto-logged actions (event created, etc.)
- ☐ Add the extra categories + Expense 3 from step 7 to trigger the Panic Button
- ☐ Open the Rebalancer Sandbox and try Proportional, Targeted, and AI-Suggested strategies
- ☐ Toggle a lock icon and confirm that category is excluded from the recalculation
- ☐ Commit the rebalance and confirm the Budget page updates (banner disappears, allocations change)
